A growing number of students living in rural communities access special education teacher preparation and professional development courses via **technology**-delivered **distance** education. Success in these courses depends on the effective use of **technology** to access information and course materials, complete and submit assignments, and communicate with instructors and classmates. To increase the likelihood that **distance** education students would have the needed **technology** skills to succeed as **distance learners**, program supports were implemented. Supports included a precourse **distance** learning workshop, on-line **technology** help files, and access to a **technology** assistant. Results indicated that student confidence improved in the use of **technology** skills addressed in the precourse workshop and practiced during the following semester.

Special education teacher shortages in the United States are critical, include all categories of special educators, and are not limited to any specific geographic region (Billingsley, 1993; Boe, Cook, Bobbitt & Terhanian, 1998; Brownell & Smith, 1992; Smith, McLskey & Taylor, 2002). Shortages of certified special education teachers are most critical in rural areas of the country (Koury, Ludlow, & Wienke, 1991). The lack of even one special education teacher can put an entire small district in jeopardy (Thurston & Sebastian, 1996). Although the total number of special education teachers needed in rural
